

CSI Wesley Institute of
Technology and Sciences
(Affiliated to JNTUH)

Bachelor of Technology (B.Tech)
Computer Science Engineering
Dec 2021 – Aug 2025

 SKILLS

Languages

Java, SQL, JavaScript

Frontend

HTML, CSS, JavaScript, React.js

Backend

Java, JDBC, Servlets

Frameworks

Spring Boot, React.js, Hibernate,
Spring MVC

Tools & Technologies

REST APIs, OOPs, JSON, Git

Databases

MySQL, PostgreSQL

Platforms / IDEs

Eclipse IDE, VS Code, Postman,
Maven

 CERTIFICATIONS

- Certificate of Full Stack Developer by QJ&PY Spiders (2025)
- Certification for completion of Python for Beginners Website from Great Learning (2024)

HARSHITHA BURRA

FULL STACK DEVELOPER

79950-23275 | burraharshita@gmail.com | linkedin.com/in/harshita-burra-in79496a2bo

 INTERNSHIP EXPERIENCE

Full Stack Developer (Java) – QJ&PY Spiders Jan 2025 – May 2025

- Completed a comprehensive internship focused on Java Full Stack Development and Web Technologies.
- Developed and deployed responsive web modules using Java, Servlets, JSP, Hibernate, HTML, CSS, JavaScript, and REST APIs.
- Applied Object-Oriented Programming (OOPs) principles, Design Patterns, and Spring Boot concepts in real-time projects.
- Gained hands-on experience in database design, integration (MySQL), and building secure, modular, and scalable web applications.
- Actively participated in debugging, testing, and code optimization to deliver high-quality solutions.

 PROJECTS

1 Car Rental Management System

Developed a web application for car rental services that allows users to register, browse available cars, make bookings, and manage rentals. Admin can manage cars, bookings, customers, and payments. The system includes real-time booking updates and availability tracking.

Key Features:

- User registration & authentication
- Car listing with availability tracking
- Booking management and status updates
- Admin dashboard for full management

Tech Stack: Java, HTML, CSS, JavaScript, Servlets, Hibernate, MySQL

2 Logistic Services Management System

Built a logistics platform to manage end-to-end cargo delivery services. Users can book cargo, assign drivers, track shipments, and manage deliveries. Admin oversees cargo, drivers, routes, and delivery status.

Key Features:

- Cargo booking and tracking
- Driver assignment and route management
- Pick-up and drop location management
- Real-time delivery status updates

Tech Stack: Java, Spring Boot, Spring MVC, Hibernate, MySQL, HTML, CSS, JavaScript

3 Connect X – Real-time Chat Application

Developed a real-time chat application similar to WhatsApp/Telegram that allows users to send messages, share media, and create group chats. Built with secure authentication and real-time messaging.

Key Features:

- One-to-one and group chat
- Real-time messaging with online status
- Media sharing (images, files)
- Secure login and user management

Tech Stack: Java, Spring Boot, Spring MVC, Hibernate, MySQL, React.js, WebSocket

 ADDITIONAL HIGHLIGHTS

- Strong understanding of OOPs concepts and Data Structures
- Experience in building responsive and user-friendly web applications
- Good problem-solving skills and ability to work in a team
- Passionate about learning new technologies and delivering quality solutions
